## Editor's Letter

Thanks to Robert William Harrison for contributing the Family Group sheets and Pedigree Charts on our 23rd President, Benjamin Harrison and his grandfather, the ninth President, William Henry Harrison. The line continues to Richard Harrison born about 1595 who had at least 2 sons, Benjamin and Thomas, born about 1619 at Kingston upon Hull, Yorkshire England. Robert William Harrison descends from Thomas Harrison. For more information on Robert William Harrison see TREE TALK Volume 24, Issue 3, Spring 1999.

Thanks to Genealogy Gems: News from the fort Wayne Library #85, March 31, 2011 for permission to reprint "Remembering Margins" by Kay Spears.

Our member, Mary Ann Koerth Niswanger contributed the family group sheets beginning on page 129. Thanks, Mary Ann.

Ogreta W. Huttash was the Registrar of the William Roark Chapter, Daughters of the Republic of Texas (DRT). I have compiled a list of the members of the William Roark Chapter, DRT and their Republic of Texas Ancestors which is printed beginning on page 126. Mrs. Huttash's application for membership in the DRT was published in volume 35, Issue 3. We have received permission to print the applications of Georgie Gene Uzzle, Bettye Collier Smith, and Mae Gean Pettit and will print them in future issues. I solicit the help of our readers to obtain the addresses of the other DRT members (or their Executors) shown beginning on page 126 to obtain permission from them to print their applications.

Making an annual index is a big job requiring help from others. My thanks to Gene Uzzle, Joan Singletary, Helen Marable, Marcella Snow, and Eileen Jones for their help.

**Gordon Bennett**  
**Editor**

### **Remembering Margins by Kay Spears**

Eventually, most researchers compiling family histories will want to put their work into a printed or electronic “book” for preservation and sharing. Unfortunately, some treat the page like an artist’s canvas, and try to fill nearly every inch of space without considering margins. The presence of appropriate white space on the page improves appearance and readability, even for works that are only distributed in a digital format. In the case of printed works, it would be a shame to see your hard work cut off in the trimming process or rendered difficult to read by a tight binding, just because of inadequate margins.

Following is a brief review to help you locate margin settings in a variety of programs.

#### Microsoft Word 2003 and older

The default side margin setting in Word is 1.25 inches. We recommend a margin of at least one inch for all books. The margin settings are located under File>Page Setup>Margins. If the dialog box is not displaying margins in inches, you can change the setting by going to Tools>Options>General. Find the Measurement Units drop down box at the bottom of the page, choose “Inches” and click OK.

#### Microsoft Word 2007/2010

Settings are located in the ribbon at Page Layout>Margin. The following options are available: Normal (one inch), Narrow, Moderate, Wide, Mirrored, Office Default 2003, and Custom Margins. The Office Default 2003 option opens up the old margin dialog box.

#### Microsoft Publisher 2003 and older

The default margin is set at one inch. A word of warning – unlike Word, there is no cursor that prevents you from going beyond your margins. Your text is maintained inside a text box that can be stretched or shrunk. If you want to change your margin settings in Publisher go to Arrange>Layout Guides>Margin Guides. A couple of other hints: if you use a professional printing company for publication, make sure they are equipped to handle Microsoft Publisher; some are not. Also, when using Publisher take advantage of the Guide lines that can be pulled over from the ruler. Just place your cursor on the ruler, hold the left click button down and drag. You should see a green line. This guide comes in handy for keeping text boxes straight.

These green lines will not print.

#### Microsoft Publisher 2007/2010

A Margin drop down box is in the ribbon, under Page Design. Your choices are Wide (one inch), Moderate (default 0.5), Narrow, None, and Custom.

## Remembering Margins

### Adobe InDesign

InDesign is similar to the old Adobe Pagemaker. When you open InDesign, margins probably will be measured in “picas” or “p” instead of “inches.” To change the scale to inches, first make sure that only the InDesign application is open and not a document. Go to Edit>Preferences>Unit & Increments and change to inches. InDesign’s margin setting defaults to 0.5 inches, so this will need to be changed. Go to: Layout>Margins and Columns and change Top, Bottom, Inside, and Outside. As in Publisher, the cursor will not be stopped by the margin; all the text work is done inside of a text box. Also, as in Publisher, you may pull the guide lines from the ruler.

### Adobe Illustrator

Normally, Illustrator is used for graphics, posters, flyers, etc. and not for large manuscripts or text editing. However, if you want to do something in Illustrator and you need a margin, here is a little trick that will help. Go to View>Show Rulers. Now pull guide lines from the rulers into the positions where you want to see margins to help you frame your work.

Genealogy Gems: News from the fort Wayne Library #85, March 31, 2001. Used by permission.
